

Dear Sir or Madam

We warmly welcome you to the second nCLAS forum on July 12th, 2018, taking place at Fraunhofer IPA in Stuttgart.

nCLAS, the Innovation Center for Laboratory Automation Stuttgart, has become a well-established platform for the development of sustainable solutions through collaborative development.

The motto of this year's forum is »Sustainable Lab Automation« – demand-oriented solutions for targeted applications that can be used in a flexible and long-term way without binding high resources.

You can look forward to an exciting program including

- High-level speakers with experience in the development and application of laboratory automation in industry and academia
- Round table discussions about future technology trends
- Demonstration of first use cases in the nCLAS lab
- Industry exhibition showing latest developments in lab automation

Use this great opportunity to network ...

We look forward to meeting you at the 2nd nCLAS Forum 2018 in Stuttgart!

Kind regards,

Andreas Traube
Head of department
Laboratory automation and biomanufacturing engineering
